

**Wheat Domestic Fundamentals:**

- Wheat prices in cash market firmed up despite lower parity for export. South Indian demands are expected soon as export from south India will consume surplus wheat soon .Higher carry in cost is expected to restrict loss.
- However, overseas market is not very supportive for Indian wheat and maximum Indian export is likely to be offloaded in neighbouring countries. Even future market closed lower as stakeholders released their positions in nearby months. Current month expiry, approaching near, also restricted gains.

**Wheat International Fundamental:**

- CBOT wheat futures ended lower, succumbing to outside market pressure and a lack of supportive fundamental news. Wheat and soybeans both under pressure all day, thanks to a stronger U.S. dollar and worries about the economy along with Europe's debt crisis.
- World production is raised by 3m. tons, to 677m.(674m.). Total world wheat consumption has been revised up to 678 m. tons (657m.) The global carryover is expected to be broadly unchanged placed at 191m.

**Outlook: Domestic:**

- Wheat prices are likely to remain steady to firm on lower demand for short term.
