

Oilseeds Domestic Fundamentals:

Mixed sentiments witnessed in soybean spot market on Friday on account of stagnant demand along with limited supplies. Dull trade activities were featured on a day in the absence of active participants asking for higher bean quantities. Madhya Pradesh's arrivals declined at 2.0 lakh bags compared to the previous day arrivals at 2.25 lakh bags. Significant buyers like Ruchi Soy, ADM, Poddar, and Noble Grain majorly supported market's arrivals on a day. Rajasthan reported unchanged arrivals at 40000 bags in the market like a day ago. (PI refer last page for Rajasthan trade detail).

International Oilseeds Fundamental:

Conab, The Brazilian agency has cut its estimates of soybean crop at 71.29 million tonnes for 2011/12 compared to its November estimate of 71.49 - 72.97 Mn T. This estimate is lowered from previous year's record output of 75.32 Mn T. As they believe that the weather of Rio Grande do sul, Brazil's one of the major soybean growing state, will face higher temperature leading to lower soil moisture level eventually leading to fall in the output. However, other Private Analysts have forecasted the crop up in the range of 72 – 78 Mn T soybean output for 2011/12 season. Fall in soybean production in Latin America will eventually keep the global bean prices strong.

Outlook: Oilseeds prices are expected to gain amid seasonal rise in edible oil and meal usage in near to medium-term.
