AGRIWATCH

Oilseeds Domestic Fundamentals:

Soybean prices extended gains on supportive buying and limited supply in MP on Tuesday. However, weakness in Malaysian palm oil limited the gains. Soybean supplies in MP increased and rose to 1.5 lakh bags compared to 1.25 lakh bags on previous day. Normal regular buying was featured to cater daily crushing need. No major activity featured apart from this. However, farmers are keen in releasing their produce at the stronger price.

International Oilseeds Fundamental:

Brazil's soybean planting in the 2011/12 season is 99% complete. The work pace is the same of last year, when 99% of the area had been sown, and is within the average for the period, of 99%. Brazilian soybean exports are expected to touch 34.5 Mn T in 2012, up 6% from total shipments in 2011, of 32.5 Mn T. SAFRAS estimates Brazil's 2011/12 soy meal production at 29.250 Mn T, up 4% from 2011. Total supply is expected to hit 30.023 Mn T. With domestic consumption of 14.3 Mn T and exports of 15.1 Mn T, total demand would be at 29.4 Mn T, 5% higher. Ending stocks fell 16% to 623,000 tons.

Outlook: The domestic soybean fundamentals remain strong. The soybean prices are expected to extend gains and move towards 2460-2500 level in short-term (Plant delivery, Indore). It is advised to buy, if need be, at the current levels 2400-2440.
