

Pulses Domestic Fundamentals:

- Mostly weak trend witnessed in pulses on lackluster buying activity amid low demand in domestic markets.
- Meanwhile, commencement of fresh tur crop (100-150 bags) in Jalgaon (Maharashtra) market leads to improvement in prices amid strong buying interest.
- As per the latest crop progress report as on Dec. 23rd, 2011, sown area under pulses in Rajasthan is up by 1% to 16.07 lakh hectares as compared to 15.89 lakh ha. in corresponding period last year's. The gram planted area rise by 1% 15.68 lakh ha. in comparison to last year 15.59 lakh ha..
- As per the latest crop progress report of Ministry of Agriculture as of December 23rd, 2011 sown area under total pulses is down by 1% to 134.18 lakh hectares (LHa) as compared to 135.21 LHa same period last year.
- The area under gram or chana (the major pulse crop of Rabi season) is also down by 4.35% to 85.78 LHa against 89.68 LHa same period last year.

Pulses International Fundamental:

- As per latest US agricultural report, this year total pulses production in China surge by 7% to 4.2 MT. The mung Beans production in China is expected to be higher by 3 per cent to 980,000 MT as compared to last year due to increased acreage amid expectations of good return to growers. Dried pea production is expected at around 400,000 MT down 20 per cent year-on-year due to increasing cost of production, which is causing domestic processors to substitute more competitive price, imported dried peas. Lentils production and area is estimated to remain unchanged at last year's level of 25000 MT and 50,000 hectares respectively. Kidney beans or Razma production is estimated at 750,000 MT down 21 per cent as compared to last year as farmers switched to corn from kidney bean due to higher return and to some extent to soybean and mung beans.
- On tender front, USDA release 11,270 MT purchase tender of yellow peas for February to March shipments.

Outlook: Prices are likely to remain weak as on dull demand.
