

Domestic Fundamentals:

- Steady tone witnessed in domestic edible oil markets due to thin trading activities from retailers and wholesalers.
- Groundnut oil couldn't sustain at higher levels due to higher arrivals of G/N seed in the major markets amid sporadic demand adds bearish note to groundnut oil prices in today's trading session. As per the survey conducted by the Solvent Extractors Association (SEA) groundnut production in Gujarat expected to be 17.75 lakh tons which shows fair yield in current season despite of low acreage which might weigh on the market in near term.
- Palm oil and soy oil remained steady due to lackluster buying interest of local traders on account of poor demand meanwhile inline festivity might support the palm and soy oil prices in near term.

International Market Fundamentals:

- CBOT soy oil futures (Dec '11) prices rose by 0.58 cents/lb to 52.44 cents/lb. Malaysian palm futures (Dec '11) prices rose by 62 points to MYR 2906 per MT in today's trading session.
- USDA reduced world soy oil production by 0.3 per cent to 43.11 MMT (in its October month report) compared to 43.24 MMT productions in September month projections. Meanwhile USDA increased the world ending stocks of soybean oil by 3.61 per cent to 2.58 million tons. Meanwhile USDA soy oil projection might weigh on the markets in near to medium term.

Outlook:

Looking ahead, domestic market edible oil price is likely to remain range bound for short term as of lean buying interest in the market. Any surge in demand for upcoming festivities likely keep the edible oil prices marginally firm tone. Meanwhile, domestic edible oil demand might surge during this week.
