

#### **Fundamentals:**

Guar fell as continued rains in the sowing belt of guar may improve sowing activity. Buying activity has declined at highs and traders may wait for further dips. Traders, stockists and millers continue offload stocks at higher levels which is putting a check on the rising prices. However concerns remained amongst traders that shortage of stocks till fresh stocks arrive in October may continue to support at lows. Millers also remained concerned that downgrading of U.S Credit ratings may affect the exports in the longer term.

According to IMD, widespread rainfall is expected over Gujarat and East Rajasthan during the next 48 hours which would support the sowing activity.

## **Outlook:**

Guar seed and guar gum prices may continue downtrend due to weak export demand and weak buying activity. Rains expected in the next 48 hours may help sowing activity. However shortage of stocks may support prices at lows.
