

**Fundamentals:**

Guar prices continued with a mixed tone during the Monday's trade. Uncertainty continued in the market with production estimates remaining on the lowers side. Crop arrivals remained lower in Haryana and Rajasthan while demand remained firm. Cash markets may be influenced by the weaker futures counter in the next few days as participants will look to buy at lower levels. New crop arrivals (all India basis) on Monday totaled at 70,000-80,000 bags (1 bag =100Kg) against previous day's arrival of 125,000 bags. Export demand remained subdued however demand for guar gum powder and split varieties remained firm on a weaker rupee. Meanwhile, harvesting of guar crop is in full swing in Rajasthan and Haryana and weather remains hospitable for crop harvesting. Harvesting in Gujarat will start in another week.

**Outlook:**

Both guar seed and guar gum prices are expected to remain range bound with slight weakness in coming days on arrivals pressure. However, lower production estimate, lower carry-in stocks and expectation of good guar gum exports this year also may support the prices in medium to long term.

**Futures Market:**

Falling open interest and rising prices for **NCDEX Guarseed December contract** is indicating that the short sellers are covering their positions and the upmove will not be sustained unless new buyers enter the market. As both open interest and prices are falling for **NCDEX Guargum December contract** it indicates long liquidation and suggests a possible trend reversal in near future.
