

## Oilseeds Domestic Fundamentals:

Soybean (plant delivery, Indore) prices witnessed firm tone due to rise in CBOT soybean on improved export demand and bullish BMD CPO, Friday. Soybean arrivals in Madhya Pradesh were reported up at 250,000 bags compared to 50,000 bags on Thursday. RM seed prices featured sluggish tone on expected higher RM seed acreage in the current Rabi season and subdued demand in the market.

## International Oilseeds Fundamental:

Oil World has reported incidents of disease in South America. Reportedly, unusually early incidences of Asian Rust have been observed affecting soybean crop in Brazil, where soybean production for 2012-13 has been projected at 81 million tons by USDA. The Asian Soybean Rust is caused by fungi and causes defoliation, premature death, and high yield loss. It has led to significant crop losses in many soybean-growing regions of the world.

## Outlook:

Soybean plant delivery prices are likely to feature range bound movement on weak buying and fall in the international oils and fats market. However, pick-up in soymeal exports sales and seasonal demand in edible oils may limit downside.
