

Onion Fundamentals:

- The average prices of onion in Hyderabad in month of May were seen at Rs 731/ which declined by nearly 18% in month of June to Rs 604/ quintal. The decline is mainly attributed to sharp increase in arrivals from Maharashtra and Karnataka..
- Sowing in Karnataka is complete by 5-8% which is lagging y-o-y due to deficit rainfall. Sowing is likely to advance in July which leads to delay in kharif onion sowing by almost 2-3 weeks.
- As per trade sources, sowing just started in Pune while sowing in Nasik will kick off during coming couple of weeks. Any rainfall deficit during 1st to 2nd week of July as predicted by various meteorological departments of developed nations could delay sowing further.
- In Karnataka local stored onion is arriving in the market which was harvested in the month of April-May. As per the trader both arrival and prices are expected to increase after one month to meet the demand of A.P and west Bengal.
