

## Onion Fundamentals:

- In Lasalgaon and Pimplagaon, onion sowing has not been affected much by weak monsoon in those areas where farmers have proper arrangements for irrigation and there will be no decrease in area or yield. However, farmers who do not have irrigation facility are shifting to other crops. Therefore, area under onion crop is likely to be lower as compared to last year.
- In Gujarat, only 10 % of last year's Kharif area has been sown so far. As per trade sources, if it rains in August and September, than 50%-60% of last year's area would be covered. Now sowing completely depends upon the rainfall.
- As per a trader, the price trend is still bearish in Lasalgaon and Pimplagaon. Farmers are bringing to the market the produce they had harvested in April and May. Thinking that prices will pick up by July, they had stored a large part of their produce which has now started spoiling. Prices are likely to remain steady for next two weeks which are hovering in the range of Rs 500/quintal to Rs 650/quintal.
