

### Onion Fundamentals:

- According to trade sources, delay in sowing of the crop and the subsequent to low arrivals in the market has lead to rise in the prices which used to be low at this particular period of time.
- National Council of Applied Economic Research (NCEAR), has estimated a 20 percent drop in onion output for 2012-13, while domestic as well as export demand for Indian onions will remain strong.
- In Lasalgaon, average prices in December are Rs 1220 which is almost 115% more compared to previous year Rs 570/ quintal at same time.
- According to trade sources in Maharashtra, arrivals have decreased compared to previous year. This is due to drop in kharif onion production. This is getting reflected in the prices which are high.
