## Technical Analysis - Potato- June Contract at MCX

June contract of Agra delivery at MCX platform is trading above its 4-day, 9-day and 18-day exponential moving average which suggests strength is back and prices could further move up. Falling open interest in this contract also suggests short covering happening in the market. However, prices could find little resistance near 1100-

1110 zones. Long build up in far month contracts also suggests rally in prices is likely to continue for some more days.
