

Potato Fundamentals:

- In Kanpur (U.P) this year cold storages were filled 20% less compared to last year stored potato. It gives an indication toward increase in price in future as of low production.
- Potato demand in the major consuming center of Delhi is firm. Cold storages adjoining the region are taking cautious approach to liquidate stocks at lower price levels keeping in view the lower production estimates from UP.
- 'Deva Aloo' will start coming from Barabanki region of UP to the Delhi market in next 4-5 days. It fetched premium of Rs 5-6 /kg more over other varieties. The same might stand supportive for other potato varieties once it starts coming into the market.
- In Indore local produced potato is being consumed, so the local demand from other states has been decreased. Secondly this year the production was 25% more as compare to last year. The same shall keep potato in Indore region on soft note for short term.
- With recent increase in potato prices in Farrukhabad (U.P) cold storage units/growers are keen to release potato to avail the benefit of recent hike. This has increased the arrivals in market. As per the trader farmers are expecting increase in prices in near future because production is less this year compared to last year.
