

Potato Fundamentals

- In Hasan district of Karnataka, delay in rain has withered around 50% of sown area. Farmers were optimistic about this year crop and had purchased seeds around Rs. 1300/Qtl for which they had paid Rs. 600-700/Qtl last year. This is also supporting prices to increase further in UP, W Bengal and Punjab.
- In Agra total release from cold storage is 18-20% till now, last year which was 25-30%. As per the trader, this year the cold storages were filled by 80% only.
- In khaundali (U.P) only 20% potato has released from cold storage. In last few days daily release from cold storages has increased by 10% as prices have increased.
- Last year in Khaundali (U.P) the average release from cold storages at this particular time period was 300- 400 trucks/ day, which has decreased to 125 trucks per day.
- In Begusarai (Bihar) this year the production was 15% less compare to last year. Till now 15% of potato is released from the cold storage. In last few days, flow of release from cold storage has increased because of high realization at Rs. 1200/ quintal and is expected to increase further.
