

## Potato Fundamentals

- In Aligarh (U.P), 50 % potato has been released compared to only 30% at this time last year. Prices and release from cold storages are steady for the last 3-4 days. Traders are expecting an increase in both prices and arrivals after 'Janmashtami' festival.
- In Khandauli (U.P), cold storages were filled to 80% of their capacities. Till now 32% is released from cold storages. As per traders, farmers are not releasing their potatoes from cold storages because they are expecting prices to rise above current level of Rs 1800/ quintal.
- In Samastipur (Bihar), till now 30% potato has been released from cold storages whereas last year 10% was released at this time. Prices are likely to increase further because this year release from cold storage is high compared to last year.
- As per a trader, prices in Hathras (U.P) may fall because farmers/traders have stocked potato in cold storages in hopes of high prices in the future but a sudden oversupply due to offloading is possible and may lead to lower prices
