

## Potato Fundamentals:

- In West Bengal, approximately 49%-51% potato has been released compared to last year 39% at this time. According to trade sources, released from cold storages have increased because supply outside the state has banned and farmers don't want to take risk of further drop down in prices.
- According to trade sources, the State government of West Bengal has decided to allow the supply of potatoes outside the state after October. The reason is that new crop starts coming from November month, so scarcity of potato will not be within the state at that time.
- In Indore, locally produced potato is coming in market. According to trade sources, prices are range bounded between Rs 750 to Rs 850 from last few days. Further prices are expected to remain stable for next few days.
- In Bangalore, arrivals are continuously decreasing because supply of Potato from U.P region is not continuous due to heavy rainfall. At present, U.P and Karnataka (Hassan) are the major suppliers of potato to Bangalore.
