#### **Pulses Domestic Fundamentals:**

- Steady to slightly firm sentiments featured in various key markets of pulses.
- Reportedly, there is a stock of 6 lakh bags of fresh moong in Merta City, Nagaur.
- Pulses have been planted in 140.66 lakh hectare as against 142.38 lakh hectare in 2010. The area under gram which is
  the largest rabi pulse crop has been sown in 87.22 lakh hectare against 92.77 lakh hectare during the same period last
  year.
- Meanwhile, we expect tur prices to stay firm for coming couple of weeks due to lower carryover stocks and estimated lower production (22 lakh tons) for current season. This might widen demand and supply gap by 2-2.5 lakh tons. Going through the season we expect tur prices to stay firm. Any major correction in tur prices might be a buying opportunity at spot.

- Bulk traditional exports of pulses from Canada improved in December, with total exports increasing 39% from the previous month, though falling 15% from the same period last year.
- Reportedly, pulse exports from Myanmar continued to ease in November, though remaining above year earlier shipment volumes.
- Overall Myanmar's crop prospect is very strong and exporters are unwilling to hold on to new stocks.

**Outlook:** Urd, Masoor and Tur prices are likely to stay firm for short term with expectation of bullish long term fundamentals. Chana and peas prices are likely to stay range bound with intermittent spikes during coming couple of days.
