

Pulses Domestic Fundamentals:

- chana's prices witnessed upward movement at futures market today. It is expected that uptrend would be seen in futures market due to delayed monsoon and low supply of pulses.
- Chana prices might touch new highs, as carryover stocks have depleted considerably in current year and crop output is low. Carryover stocks have been declining over couple of year due to lower production and declining stocks. Low arrivals in spot market have made stockiest and buyers to buy substantial quantities in anticipation of higher prices in times to come.
- Due to high returns cultivators will most likely shift the moong area towards gaur, as informed by market participants.
- Due to heavy rains in some parts of Assam, some of the crop area has submerged under water and most of the crop is in normal condition and no pest or disease is being reported till date. As per the information from Assam Agriculture Department 0.06 lakh ha, 0.06 lakh ha and 0.04 lakh ha has been planted under tur, urad and moong respectively as on 29 june, 2012.
- On 29 june 2012, at JNPT port 80 container of Burmese tur, 10 container of Burmese urad and 3 container of Burmese moong were reported.
- South-West monsoon is expected to commence in North-west India by 9 july 2012. According to IMD monsoon recorded in the month of June is 29% below, year on year basis average.
- To achieve the production of more than 19 million tonnes of pulses in present kharif season, a special programme has been launched. The increase in production will be achieved by intercropping and by promoting dry land agriculture techniques like in situ moisture conservation. Moreover, SFAC would also help small farmers in utilizing technologies and implements at less cost.
