

**Pulses Domestic Fundamentals:**

- Mostly weak tone witnessed in pulses cash markets. NCDEX chana also fall on profit booking.
- Regular supplies from overseas and commencement of new domestic crop with lack of buying support continue to weigh on pulses prices. Meanwhile, stockiest, processors and millers remained sidelined due to some quality concern in new crop like high moisture content and spotted crop.
- According to the Ministry of Agriculture (first Advance estimate 2012-13):-  
 The estimated production of kharif pulses is down by 14.6 per cent to 5.26 million tones compared from 6.16 million tones in last year. The shortfall is mainly due to shortfall in moong and other kharif pulses. Meanwhile, higher production of tur and urad was estimated. The estimated production of major pulses during Kharif 2012-13 is as under:
