International Fundamental:

- In International market, pea markets remain firm as offers from growers remain just behind the sort term needs of processors and exporters. Bullish sentiment was helped by worries only 30% of Argentina's green pea crop will be equivalent to a North American No 2 grade product and that 20% was destroyed by heavy rainfall. The harvest will be general by the middle of November, at which time markets will get a firmer fix on the range of qualities grown this year.
- Pulses Breeding Australia unveiled new pea variety named PBA Pearl. The new variety has good resistance to downy mildew and bean leaf roll virus. It is suitable for crop topping and has superior lodging resistance at maturity compared to other semi-dwarf varieties. This semi-leafless, erect growing variety has good early season plant vigor, flowers early to mid season and produces a high number of pods per plant.
- During the week ended on 28 Oct., visible field pea stock in Canada's licensed elevator system totaled 170900 MT, up by 89600 MT from previous week total stock of 260500 MT. Moreover, it is also down by 100500 MT from 271400 MT by this time of the season during the last year. The total export during this period, totaled at 108200 MT as compared with 20000 MT in last week. Export shipments so far in this season total at 619000 MT of peas down by 59500 MT from 678600 MT in last year.

Outlook: - Weak movement is likely to witness due to dull demand.
