**Highlights of the week:**

- Regular supplies from overseas and commencement of new domestic crop with lack of buying support continue to weigh on pulses prices. Meanwhile, stockiest , processors and millers remained sidelined due to some quality concern in new crop like high moisture content and spotted crop.
- CACP has recommended a hike in minimum support price (MSP) of gram by Rs.200 to Rs.3000 a quintal and masoor by Rs.100 to Rs.2900 a quintal for upcoming 212-13 rabi season to boost the production of pulses.
- On crop front, market participants are expecting higher yields on good rainfall in August and September month and may make-up for the loss in area coverage. Pulses growing regions in M.P., Maharastra, U.P. and A.P. have been well covered by the monsoon and raise hopes for higher yield. But, in Rajasthan and Gujarat very low area has been covered.
- Moisture content in new crop is reported . In central India, procurement is likely to take place in second half of October month on new kharif pulses arrivals.
- On crop front, high moisture content (14-15 per cent) in new moong reported at Kanpur market.
- Commencement of new urad at local markets in M.P. (like Dabra) reported during today's session. The new crop contain high moisture content 820 per cent.
- According to Ministry of Agriculture, Kharif pulses has been sown in 101.18 lakh hectare till 29th Sep., 2012 as compared from 106.91 lakh ha. normal area sowed by this time of the year.
- According to the Ministry of Agriculture (first Advance estimate 2012-13):-
- The estimated production of kharif pulses is down by 14.6 per cent to 5.26 million tones compared from 6.16 million tones in last year. The shortfall is mainly due to shortfall in moong and other kharif pulses. Meanwhile, higher production of tur and urad was estimated. The estimated production of major pulses during Kharif 2012-13 is as under:

Pulses (in MMT)	2010-11	2011-12		2012-13		% Change w.r.t last year 4 <sup>th</sup> Adv. Est.

- Minister of Agriculture Sharad Pawar has advised farmers to sow rabi crop early to reap the benefit of moisture in the soil. Winter crop would compensate the summer crop losses. It will further check food inflation numbers in coming months.
- The National Agricultural Cooperative Marketing Federation (Nafed) starts procuring urad at Maharashtra local markets. According to the official sources of NAFED, urad is being bought at Rs.4300 per quintal at Latur and other markets. Moreover, organization may procure moong and urad in next week in various markets of Andhra Pradesh. However, decision has not taken due to high moisture content in new crop. In central India, procurement is likely to take place in second half of October month on new kharif pulses arrivals.
- Indian Govt. extends control order on pulses, edible oils and edible oilseeds from 0.1.10.2012 to 30.09.2013. The main objective of control orders is to enable the State Governments to continue to take effective de-hoarding operations under Essential Commodities Act, 1955 by fixing stock limits/licensing requirements etc. in respect of these commodities, especially in view of rising prices and unsatisfactory monsoon in the prevailing circumstances. This is mainly to ensure availability of essential commodities at fair prices. In August 2006, certain provisions of the order dated 15.02.2002 was added to maintain pulses and wheat prices initially for a period of six months. Later, the validity has been extended from time to time and on some more commodities. At present stock limits are permitted for pulses, edible oils and edible oilseeds for a period up to 30.09.2012 and in respect of rice and paddy up to 30.11.2012 for the 7 States/Union Territories.

### **International**

- USDA's Economic Research Service, record 1.969 lakh acres were planted under chana (both kabuli and desi) crop this year. In U.S., kabuli chana consumption is generally three times that of desi although. The report also states that farmers may get 11% higher season's weighted average price and value for all chana crop production is estimated to 108 USD millions in 2012 compared to 77 USD million in 2011.
- USDA Commodity Credit Corporation seeks purchase tender of 1330 MT for shipment as food aid.
- New desi chana varieties (Neelam and Ambar) were commercially released for the export market. Both Ambar and Neelam's are high yield varieties and also resistive to the ascochyta disease and has been verified in other parts of Australia and India.
- According to the Saskatchewan (Canada) Ministry of Agriculture for the period September 18 to 24, 2012:-
  - ✓ 83 percent of chana has been combined.
  - ✓ 98 percent of masoor has been combined.
  - ✓ 98 percent of peas are also combined.
  - ✓ Farmers are busy harvesting, seeding winter cereals, hauling bales and controlling weeds.

**Outlook:** - Arrival of new crop and dull demand weigh on prices.
