Executive Summary

In domestic cash markets, Pulses witnessed weekly tone along with thin trading activities and dull demand.

The markets were also pressurized by low quality new crop in domestic markets. Besides, continuous arrivals of imported pulses also lead to continuous availability in market. New tur crop arrival reported in some mandi. However, full pace arrivals are likely to be reported in December month.

MOA revealed that rabi pulses sowing 2012 down by 6.54 percent to 102.49 lakh ha. as on Nov.30,2012 in comparison of 109.56 lakh ha. same period during last year. Rabi sowing is lagging behind due to delay in planting. Favorable weather in Domestic, followed by the large import of Australian chana, has eased concerns about tight global chana supplies restricting gains in chana.

In November, imported pulses prices also remain lower in comparison of previous month.

International market also witnessed steady tone in the week. Pakistan's import of pulses declined by 52 percent or $19.279 million in October this year, as importers are expecting bumper crop in the coming season. Country imported $18.050 million in October this fiscal year as compared to the commodity's import of $37.329 million in Oct last fiscal year, showing a decline of 51.65 percent or $19.279 million.

Outlook: - Dull demand and thin buying interest will result in steady to weak movement in prices.
