AGRIWATCH

27th August, 2012

Sugar & Gur Domestic & International Fundamentals

- Sugar prices are continuously moving downwards in key spot markets today taking cues from increased sugar quota and weak international sugar price sentiments.
- Indian sugar mills produced 25.9 million tons of sugar in the MY 2011-12 till 31st July 2012 with 25 southern sugar mills are still running their cane crushing operations which might take the sugar production figure more than 26 million tons. It is noticeable that Agriwatch has estimate 25.9 million tons of sugar production for 2011-12 a year ago which has now almost achieved.
- Sugarcane area has increased by 4% Y-o-Y to 5.288 million hectares for the coming MY 2012-13. Increase in cane area is contributed by states like UP and Bihar. It is notable that sugarcane area covered around 5.45% of total agricultural land area.
- Gur prices are continuously declining in Muzaffar nagar markets owing to higher stock position of gur kept in the cold storages. In addition to it, weak offtake of gur also pressurizing the prices of gur in the coming days.
- Around 844000 bags (40 kg each) of Gur has been stored in Muzaffar nagar cold storage till 21st August 2012, which are 144000 bags higher compared to same period in last year, stock position. Out of total gur stock position, there are around 596000 bags of Chaku variety gur stored in Cold storages.

Outlook:

Sugar prices are moving range bound at present as markets are in confusion over sugar production scenario and lack of clarity over yield of sugarcane for the coming season. We expect prices will move in a range with weak tone in the coming days.
