AGRIWATCH

#### Sugar & Gur Domestic & International Fundamentals

- Mixed sentiments recorded in key sugar spot markets on Monday as markets could not find adequate cues to decide the prices either side.
- India's sugar production reached at 2.33 million tons in the first two months starting from October 1<sup>st</sup> 2012 marginally down from 2.39 million tons sugar produced by mills last year same period. Delay in sugarcane crushing by UP millers owing to non declaration of cane price by UP government for 2012-13.
- Maharashtra sugar millers had crushed around 48.93 lac tons of cane till 18<sup>th</sup> Nov 2012 and produced around 4.06 lac tons of sugar with an average recovery of around 8.29 percent. However, in total around 103 mills had started their crushing operations till 18<sup>th</sup> Nov which was 10 mills less compared to same period last year.
- Dry weather in Brazil allows millers to extend their crushing operation up to Christmas. Usually, rain used to disturb the cane crushing operations at this point of time.
- Brazilian raw sugar weighs on Thai sugar premiums. It is notable that fresh Brazilian sugar demand came from Indonesia. Thai raw sugar premium stood at premium of 60 to 70 points over New York's March contract which was 60 to 65 points last week.
- Thailand millers had crushed around 1 million tons of sugarcane and made around around 50000 tons of sugar as reported which is around 28% higher compared to last year sugar produced by Thai mills same period last year.
- Gur prices are firm today in Muzaffar nagar market owing to lower arrivals as gur manufacturers don't want to sell gur at lower rates.

#### Outlook:

Sugar prices likely to continue its downward movement in the coming days keeping in view continuous sugar imports and higher sugar quota for the coming months.
