

Domestic Fundamentals:

- Domestic edible oil prices derived positive cues from its bench mark market of CBOT and BMD futures due to expectation of grater buying expectation by China.
- At the same time demand for edible oil improved from different trading centers with special reference to MP and Maharashtra. Renewed demand for edible oils both at retail and wholesale market lends underlying support to the edible oil complex.
- Plants that were not keen to sell oils at subdued price levels due to shrinkage of trade margins results into tight supply of domestically produced edible oils during last couple of days. The same underpin the edible oil market sentiments for short term.
- Demand for RM oil is improving in the northern region while demand for palmolein stay firm from South. At the same time lower port stocks for ready to use edible oils stand supportive for prices. Moving forward we expect supply to improve with appreciation of rupee and new crop supply from Argentina and Brazil.

International Market Fundamentals:

- Latest soybean production estimates by the Argentina government reveal production to stay close to 43 million tons which is one of the lowest production estimates projected by various agencies.

Outlook:

Concisely edible oil price is likely to stay range bound with bullish bias for short term.
