

**Domestic Fundamentals:**

- Edible oil basket traded with a mixed tone on Wednesday.
- Palm oil prices surge significantly in major domestic markets due to better buying interest.
- G/N oil prices stood unchanged on account of thin trading activities. Most of the G/N seed arrivals consumed by the peanuts traders for export.
- Bullish international fundamentals and depreciating INR against US dollar add fuel to the edible oil prices in domestic markets. However, market is due for correction in days ahead.

International Market Fundamentals:

- Prices are likely to hit 4000 ringgit (\$1,320) by the end of June ahead of the Muslim fasting month of Ramadan and low palm output phase would support the markets in medium term - Dorab Mistry.
- Palm oil products exports from Malaysia for the period of first twenty days of March rose by 6.6 per cent to 1,055,071 tons from 989,868 tons shipped during first twenty days of March-SGS.

Outlook:

We expect edible oil prices to ease in medium term due to decline in usage in line with the consumption pattern. However, downward potential will be limited mainly due to lower RM seed output estimate
