

Domestic Fundamentals:

- Edible oils witnessed steady to slightly firm tone in major spot markets on dry weather concern over key soybean growing areas of US.
- India's Cabinet approved a new import tax structure on refined palm oil to protect local refiners and makes palm oil imports costlier from Indonesia. India's imports of refined palm oil from November to June nearly doubled compared with the corresponding period last year, to 1.2 million metric tons and the imports of refined and crude edible oil (Ratio) had increased by 6% to 19% compared to Nov.'10-June'11. The base import price would be calculated on international prices rather than a fixed price.
- Crude palm oil featured firm tone on better buying interest and new import tax structure would make palm oil imports
- Groundnut oil rose marginally at its benchmark market Rajkot due to need based buying. However, good availability of G/N oil limit upside.
- Edible oil basket may trade sideways to slightly firm tone in the coming days on bullish oilseed fundamentals and weak INR against US dollar. However, need based buying could limit upside.

International Market Fundamentals:

- CPO at BMD was ended higher on Friday's trading session on bearish Malaysian palm oil products exports figures.
- As per ITS, Malaysian palm oil products exports for 1-20 July fell 23 percent to 764,273 tons from 991,917 tons shipped during 1-20 June.

Outlook:

We expect edible oil prices may trade with a steady to slightly firm tone.
