

Domestic Fundamentals:

- Edible oils witnessed weak tone in major spot markets on limited buying and weak international edible oil market.
- Refined soy oil featured weak tone due to sporadic buying at major physical markets and recent rains over key soybean producing areas of MP and Maharashtra support the crop growth prospects.
- As per Ministry of Agriculture, sown area for Kharif Groundnut stood at 31.48 lakh hectares as on 07 Aug 2012 down 5.61 % compared to corresponding period last year, which was 37.09 lakh hectares.
- Edible oil basket may trade sideways to slightly weak tone in the coming days on bearish cues from international market and good rains over MP and Maharashtra. However, festive demand in the coming days could limit downside.

International Market Fundamentals:

- CPO at BMD was ended lower on Tuesday's trading session on rising Malaysian palm oil stocks. Besides, developing El Nino pattern over South East Asian countries may hampers the palm oil production in medium term which could lead to bounce back in the prices.
- As per SGS, Malaysian palm oil products exports for 1-10 Aug rose 6.8 percent to 354,614 tons from 331,978 tons shipped during 1-10 July.
- The Indonesian Palm Oil Association (GAPKI) has lowered its palm oil export estimate to 17.59 million tons, down 0.41 million tons compared to its previous target due to feeble buying from China and Europe. Besides, Indonesian palm oil output is expected to be between 23 million and 25 million tons for the current year.

Outlook:

We expect edible oil prices may trade with a steady to slightly weak tone in the coming days.
