AGRIWATCH

### **Domestic Fundamentals:**

- The major Edible oil markets remained closed for Eid ul Fitr, Monday
- Groundnut oil traded with a firm note on lower availability of G/N seed for crushing and scanty rains over key groundnut producing areas of Gujarat may support the G/N oil prices in near term.
- As per Ministry of Agriculture, Rajasthan's sown area for Kharif groundnut as on 17 Aug 2012 stood at 332.8 thousand hectares down 5.29 % against the same period a year ago, which was 413.8 thousand hectares.
- India imported 7,104,667 tons of edible oil in the current oil year (Nov.-Oct) up to July 2012. However, edible oil imports were 5,829,273 tons in the corresponding period last year – SEA of India.
- Edible oil basket may trade sideways to slightly firm tone in the coming days on bullish cues from international market. However, good rains over MP and Maharashtra could limit the bulls rally in medium term.

### **International Market Fundamentals:**

- As per CNGOIC, Chinese soybean output for 2012 seen at 13 million tons, down 10.25 percent as compared to same period last year due to lower acreage.
- Cool weather over US Midwest provide some relief to the standing soybean crop and rising Malaysian palm oil stocks could weigh on the international edible oil markets. However, improving Malaysian palm oil export figures and tighten global soybean supply may limit excessive losses.

### **Outlook:**

We expect edible oil prices may trade with a steady to slightly firm tone in the coming days.
