Domestic Fundamentals:

- Edible oil prices mostly featured steady to slight firm tone on better buying support. Meanwhile, losses in CPO prices at BMD limit excessive gains.
- MMTC has floated a tender to buy 48,000 tonnes of refined, bleached and deodorised (RBD) palmolein, sourced from Indonesia and/or Malaysia. The Tender offer deadline is Dec. 3, 2012.
- Groundnut and cottonseed oil featured firm tone on renewed demand from re-packers and lower availability of groundnut seed for crushing.
- Refined soy oil at major cash market featured steady to firm tone on better buying interest. Moreover, slow soybean offloading by farmers adds spillover support to the prices. However, poor buying inquires in the case of soy meal limit upside.
- Palm oil prices witnessed slight losses tracking bearish cue from international palm oil market. Besides, cottonseed oil quoted higher on retail demand.
- Edible oil basket is expected to feature steady to slightly firm tone in near-term with expected seasonal rise in the edible oil demand.

International Market Fundamentals:

NCDEX Soy Refined Oil:

- CPO at BMD ended slightly lower on weaker palm oil export demand and higher palm oil ending stocks in the South East Asian countries. Focus during the coming days will be on the Malaysian palm oil export figures for November, palm oil analyst meeting on Nov. 30, and South American weather over key soybean producing region.
- According to Indonesian Palm Oil Association, palm oil exports from Indonesia rose to 3 percent to 1.424 million tons in October compared to the previous month. Total palm oil products (Palm oil and Palm kernel oil) exports in January-October reached to 14.34 million tons.

Outlook: Edible oil basket is expected to trade with a steady in near-term with festive buying getting over. However, prices are likely to improve with expected seasonal rise in the edible oil demand.
