

Wheat Domestic Fundamentals:

- **Clue less wheat market is bound to trade range** bound for short to medium term. Medium term fundamentals for wheat markets are not very encouraging. Bumper crop prospects, lackluster export demand weigh on market. Supply side is expected to remain ample given the higher offtake from govt.'s godown and clear intention to augment supply through various channels.
- **Higher production estimate of 88.3 million tonnes** by govt. and higher stock in central pool 234.18 lakh tonnes restrict market to gain further. There is no damage report from any pockets of producing states as of now.
- **Arrivals from new crop in Gujarat are** increasing and pressure is likely to be felt by the third week of Feb. New wheat contains 14 percent moisture level and millers are buying it @ of Rs1225-1240 per qtl.

Wheat International Fundamental:

- **US wheat futures stumbled, fueled by** larger world wheat stock estimates from government forecasters. Bullish traders were disappointed with world supplies rising to new record-high levels. Market also lacked any new bullish weather developments to justify pushing prices higher. Wheat had previously climbed on threats to Europe and Black Sea wheat, but with world supplies adequate to meet global demand even with crop losses.
- **World wheat market is likely to trade** weak despite possibility of crop loss due to cold wave. Ample stock and higher production estimate by various govt.s weigh on current market fundamentals.

Domestic market outlook: We expect wheat market to trade range bound.
