

Wheat Domestic Fundamentals:

- **Wheat market remained under pressure on better production** prospects and higher stock. Export demand is negligible due to disparity at current prices. Virtually there are no buyers for Indian wheat as cheaper wheat is available worldwide abundantly. Millers are sourcing wheat from govt.'s stock comparatively at cheaper prices and there is no supply shortage.
- **New wheat crop starts hitting Gujarat and M.P. and pressure** is likely to be felt by the first week of March. Today 100 bags arrived in Indore and was sold at rs 1301 per qtl. with 14 percent moisture. Similarly, almost 1000 bags arrived in Saurashtra region and was traded at Rs1250 per qtl. with 14 percent moisture level.

Wheat International Fundamental:

- **U.S. wheat futures ended mostly lower on** overflowing world supplies and pressure from corn. The market falls to 3-week lows, along with corn, despite gains in soybeans. Traders say wheat supplies are large enough to offset recent Black Sea region supply disruptions, and that export demand could continue to struggle. Increased feed wheat demand could limit losses .

Domestic market outlook:

We expect wheat market to trade range bound with weak bias for short term.
