

Wheat Daily Report 17th July, 2012

Wheat Domestic Fundamentals:

- Wheat cash market continued to increase on strong demand from exporters during the week starting 2ndJuly and is expected to stay steady at current level as higher demand is likely to support the cash market.
- Wheat prices during the week under review have increased by Rs 100 per qtl. in the states like Bihar, Uttar Pradesh and Rajasthan. Stockiest are holding back wheat stock in anticipation of higher prices in the weeks ahead and thus artificial supply crunch seems very much in sight and support market fundamentals.
- Indian wheat is quoted around \$280 to \$285 based on sourcing states a tonne free on board (FoB), up from \$256-\$257 a tonne two weeks ago.
- Export scenario for Indian wheat is very favorable for India at current international quotes and we expect • better opportunity in the weeks ahead as supply side in the global market will remain tight with lower crop estimation worldwide.

Wheat International Fundamental:

- Australia is forecast to produce 24.1 million tonnes of wheat in the 2012/13 season, the government's chief forecaster said in June, down from last year's record ,.5 million tonnes on lower plantings.
- Russian production estimate has been revised down from 55 million T to below 49 million T.
- Recent flood in Russia has impacted grains movement for shipment. US crop size is expected to be lower • than recent estimate. Argentina's wheat crop growth is slower due to cold wave and it may affect yield further.

Domestic market Outlook: Wheat cash market is likely to trade firm on fresh buying support from south India.
