

Wheat Domestic Fundamentals:

- Bulk users like flour millers are totally dependent on govt.'s stock and there is negligible supply from farmers. At current market scenario any steep decline in wheat market from current level is unlikely as demand for wheat is higher than actual supply.
- Wheat prices in domestic market is likely to trade steady to slightly firm on the back of higher demand of wheat products ahead of festive season.
- Export demand for Indian wheat too is likely to improve in the weeks ahead as global market fundamentals seem bullish.

Wheat International Fundamental:

- USDA cut its estimate of U.S. wheat ending stocks to 654 million bushels from 698 million, the lowest since the 2007-08 crop year. USDA also lowered its estimate for world ending stocks to 173 million tonnes from 176.71 million which is mainly due to lower production and few countries are taking advantage of higher international prices by exporting wheat hence their carry out stocks too will be low.
- South Korea's DongA One Corp bought 25,100 tonnes of milling wheat for January arrival via a tender on Thursday. The flour miller bought U.S. origin milling wheat from Columbia Grain & Ingredients (CGI) for arrival between Jan. 1 and 31 of next year. 11,000 tonnes of Soft White (9.5 min protein) for \$331(FOB), 1,700 tonnes of Soft White (8.5 max) for \$339 FOB, 9,000 tonnes Hard Red Winter for \$361 FOB and 3400 tonnes Northern Spring for \$378 FOB.
- France Agricultural Ministry has cut its wheat ending stock to 13 years lowest level due to rise in wheat export forecast outside European Union to 9.5 million tonnes from 9 million tonnes earlier.

Domestic market Outlook:

Demand from bulk users is expected in the mid of this month and it may support wheat market fundamentals.
