

Wheat Daily Report 17th October 2012

Wheat Domestic Fundamentals:

- Flour Millers are buying wheat at Rs 1610 per quintal at Kandla and FOR Kandla is Rs 1570 per Quintal, hence it is very unlikely that wheat will be available for exporters.
- Steady sentiments witnessed in port based states like Gujarat, Tamil Nadu and Karnataka as supply through government channel is hampered due to cancellation of tenders in Rajasthan and Madhya Pradesh.
- Export of Flour, Maida and Suji continues therefore millers are buying wheat at higher price.
- Sowing in Saurashtra region in Gujarat is expected to be around 15% of last year and overall sowing in Gujarat is likely to be 80% of previous year, sowing is likely to start within 15 days.

Wheat International Fundamental:

- British wheat yields are at a 23-year low, triggering a fall in production despite a slight rise in planted area, Britain's farm ministry said. It estimated this year's wheat crop was 13.31m tonnes, down 12.8% from the prior season's 15.26m as yields fell to the lowest since 1989.
- US Sanction hit Iran has bought wheat worth USD 983 million in first half of Iranian calendar which began on March 20, 2012.Iran has imported wheat from some 16 nations like Switzerland, Russia, Germany, the Netherlands, Brazil, and Kazakhstan.
- USDA cut its estimate of U.S. wheat ending stocks to 654 million bushels from 698 million, the lowest since the 2007-08 crop year. USDA also lowered its estimate for world ending stocks to 173 million tonnes from 176.71 million which is mainly due to lower production and few countries are taking advantage of higher international prices by exporting wheat hence their carry out stocks too will be low.

Domestic market Outlook:

We expect prices to be steady in the weeks ahead due to short supply.
