

Cotton Domestic Fundamentals:

- Cotton market witnessed stable on Monday.
- Cotton Plantation has reached 55.76 lakh hectares for 2013-14 amid good rainfall received in growing areas of cotton. This is above than the cropping area in 2012-13 was 31.38 lakh hectares.
- 38,000-40,000 bales of cotton have arrived across India. This is likely to remain steady to low as plantation activity is going on across cotton growing areas.
- Good buying from the local mills and export demand supported prices.

Cotton International Fundamentals

- Pakistan textile exports grew on good demand from US and European markets. The demand is likely to upset as economy is likely to dip.
- Cotton global stocks will be lowest level in 3 years. The global supplies of cotton have been getting tighter outside China.
- China cotton imports dip to 31% compared to the same time last year in May 2013.

Outlook: We expect domestic cotton prices to notice steady to firm tone in the near –term amid demand from exporters.
