GRIWATCH

Domestic Fundamentals:

- Mixed sentiments recorded in key guar cash markets on Friday as markets could not find adequate cues to decide the prices either side.
- Daily around 20000 quintals of guar seed arrive in various Gujarat guar markets as reported. It is notable that arrivals of guar from Gujarat region will come till next 2 months which would fulfill 3 months requirement as reported.
- Guar from Haryana is the next guar crop which would hit the market after 3 months which is just after the end of guar arrivals from Gujarat.
- Around 15% holding of guar has been reported from Jaisalmer region Rajasthan till date. Farmers are thinking to shift towards other crop from guar in their fields for the next year. High temperature damage the guar crop in the region as reported.
- Guar sowing likely to increase near to Bikaner and Ganga nagar districts as cotton sowing already delayed by 15 days and there are strong possibilities that farmers would shift towards guar in this region.
- Market participants expect prices to test Rs 6000 level in the coming weeks considering increasing supply and dull demand.
- Market is presently moving in a range overall. Monsoon would play crucial role in the upcoming guar sowing which also decide the future of the guar prices. Presently, IMD predicts normal monsoon this year, if it does then the sowing of guar would not be affected which would curb any hike in guar prices considering higher stock holding by farmers.
- As far as monthly exports are concerned, in the month of March 2013, exports of guar gum (split, powder and meal) were reported to be 47345 metric tons which is higher compared to 38819.67 metric tonnes exported in February 2013, according to IBIS.

Outlook:

Guar seed and gum prices are likely to trade weak in the coming weeks ahead. Increasing arrivals from Gujarat region pressurize the prices of guar presently.
