

Domestic Fundamentals:

- Guar prices declined today in key markets due to higher arrivals.
- Around 33723 tons of guar gum (Splits and powder) exported to various countries in October month 2013 as reported. It is notable that India has exported 24504 tons of guar gum (Splits and Powder) in September month 2013.
- Guar seed crop got hurt badly in Western Rajasthan especially in Churu, Nagaur and Bikaner districts owing to one month dry spell which damage around 50% of the guar seed crop. It is notable that these areas are totally rainfed areas.
- Market participants expect around 40 percent increase in production over last year.
 Higher acreage and favorable weather, except a short span of time, may drive production figure up to the level of 2.25 million T against 1.5 million T last year.
- As higher arrivals are round the corner, stockiest and planters stay away from the market.
 Even guar gum demand remains at low at this point of time. Even 20 to 25 percent old stocks are still lying intact. All these factors hint bearish outlook in the months ahead.
- It is notable that new crop arrives in Haryana with moisture content of 16-18% at present. However, arrivals will get pace in early November from Haryana region as expected.
- Crop of guar seed has not been damaged severely as expected earlier. Late sowed crop
 has grown upto knee size height in rain fed areas of Hanumangarh as reported. Normal
 rainfall and sufficient irrigated water availability for guar results in normal yield in
 Ganganagar region as reported.
- It is notable that new crop has started arriving in Ganga nagar and Haryana region. However, quantities are pretty less arriving in various mandis as reported. Recent rainfall in the Northern India would support the standing guar crop but also would delay the arrivals of new crop.
- It is notable that guar crop normally starts arriving in various parts of Haryana in the first
 week of October but now it would likely to arrive after 10 days of normal arriving time.
 According to a research company THL, guar cultivation has increased this year by 21%
 over last year.

Outlook: Guar sentiments are weak for medium to long term considering weak demand from International markets, higher carry over stock from last year and higher guar production scenario for current season representing huge surplus of guar stocks in the markets.
