

Maize Domestic Market Fundamentals:

- Steady to weak sentiments featured in most of the major maize spot markets on Wednesday.
- Ahmadabad feed millers of Gujarat region are currently purchasing maize from Maharashtra region at around Rs. 1500 per quintal. Sources revealed that maize could trade steady to slightly down due to sluggish export demand. Meanwhile, some weakness was reported from starch and poultry industries buyers in the spot market which could weigh on the prices.
- In Bhiwani region of Haryana, sources revealed that demand for bajra from poultry industries could shift towards maize in the coming weeks due to change in weather conditions and support maize prices.

International Market Scenario:

- Corn prices increased by \$0.10 per ton yesterday and settled at \$287.13 for March contract in CBOT markets.
- As per news sources, Feed mills in Vietnam are likely to purchase corn for February shipment, although overall grain demand in Asia remained slow this week on the expectation of record-large production in South America which generally enter the market in March.
- As per USDA, U.S. corn export figures reached to 7306361 metric tons for the 2012-13 marketing year which is lowered by ~55% from the last marketing year during the same period. However, Corn exports were up by 50 percent to 369500 metric tons from the last week and by 75 percent from prior 4-week average. Out of total weekly exports of 369500 MT reported by U.S to China (163,500 MT), Japan (110,300 MT), Mexico (46,800 MT), and Honduras (15,400 MT).

Outlook: We expect maize prices could trade steady in the near term. As no new fresh export enquiries reported in the market. However, lower stock position with the continuous demand from poultry feed industries could support maize prices at the lower level.
