

Oilseeds Domestic Fundamentals:

Soybean (plant delivery, Indore) prices improved on gains in CBOT and limited domestic arrivals, Thursday. CBOT soybean futures closed mostly higher on technical-based buying. However, improving weather conditions in Argentina and positive production prospects in Brazil limited the gains. Indore spot market was closed today due to the labour strike and no arrivals were reported. Soybean arrivals in Madhya Pradesh declined to 90,000 bags compared with 100,000 bags on Wednesday. RM seed prices edged higher in key markets today. Mustard crop arrivals have commenced in the key growing regions of Uttar Pradesh, Rajasthan and Madhya Pradesh.

International Oilseeds Fundamental:

Celeres has reported that Brazil's soybean harvest is 12 per cent complete. The pace is higher than the five-year average of 7 percent. Also, 59 percent of the expected harvest has been sold as compared to 42 per cent by this time last year. According to Oil World, tight global rapeseed supplies due to lower harvests will result in a likely fall in EU rapeseed crushings and increase imports in the coming months. Jan-June 2013 rapeseed crushings are likely to fall to 9.68 million tons from 10.55 million tons in the same period in 2012.

Outlook:

Soybean plant delivery prices are likely to feature range bound movement with weak bias, on bearish soybean supply scenario this season. The Indore (Plant Delivery) prices are expected to witness 3250-3275 levels.
