

Oilseeds Domestic Fundamentals:

Soybean (plant delivery, Indore) prices featured firm sentiments Tuesday as rainfall was reported in harvesting regions of central India raising concerns that quality of new crop may get affected. Further, improved buying activities in the spot markets due to the upcoming festive season also supported the firm tone. RM seed prices depicted gains on buying activities and strength in BMD CPO. Soybean arrivals in Madhya Pradesh were reported higher at 125,000 bags new crop arrivals, Tuesday. Rainfall over parts of central India affected the harvesting activities resulting in likely delay in new crop supplies in the markets. RM seed arrivals were steady with 50,000 bags in Rajasthan and 80,000 bags all India.

International Oilseeds Fundamentals:

As per USDA, soybean harvesting in the US was reported as 3 percent was completed. This was behind the five-year average of 9 per cent. As per Chinese government authorities, China has allowed the crushers to import rapeseed from Russia to meet increasing demand. China's rapeseed imports in June-May 2013-14 are likely to reach 3.59 million tons, up 54 per cent from 2012-13.

Outlook:

Soybean plant delivery prices are likely to feature range bound movement with a weak bias on higher soybean production estimates and new crop arrival pressure, although decline may be restricted on crop yield concerns and international factors in the near term. The Indore (Plant Delivery) prices are expected to witness 3400-3460 levels.
