Pulses Monthly Research Report

Jan, 2012

Contents

Monthly Updates

- Pulses witnessed weak tone on comfortable stock position, continuous imports and good rabi crop prospects.
- Market participants revealed that new tur and chana crop reported in domestic markets and the crop is of average-to-good quality.
- Cold waves are experiencing since last two week. Pulse crop viz. pigeonpea, chickpea and pea was affected in respect of morphological and physiological development of crop
- Myanmar's beans and pulses export surge by 25 percent to 80369 MT in November compared to the export of 64104 MT in the same period during previous year. Meanwhile, urad accounts for 63 per cent of the total exports in November, followed by moong (26 %) and tur (7%). India accounts for 76 percent of total exports in November while Singapore had a share of 14 percent. Export shipments so far in 2012 total at 14,64,203 MT as compared from the total 13,58,553 MT in 2011.(Source:USDA)
- The Canadian Grain Commission (CGC) revealed that 85,900 metric tons (MT) of field pea were exported in December. The data does not include exports from non-exporting terminals. This season total exports equaled to 775,500 MT since the August start of the current marketing year, versus 1,027,800 MT during the same period last season. The 2011-12 marketing year finished with 1,605,800 MT of peas have been exported through terminals reporting to the CGC, versus 2,461,100 MT the previous season.Agriculture Canada states that lentil area is expected to drop for the fourth consecutive year "due to lower returns in 2012-13, particularly for large green lentil types, compared to other crops. As a result, production is forecast to fall sharply. However, the decrease in supply will be dampened by burdensome carry-in stocks which will partly offset the lower production. Meanwhile, the area seeded under chana crop is forecast to fall from 2012-13 because of higher carry-in stocks and continuing decline in prices from the records set in 2011-12. As a result, production is expected to fall to 120,000 MT.
- In Argentina, chia seed sowed on 40,000 hectares which results lower area for other pulses.
- USDA seeks purchase tender for 15120 MT of pulses in 50 kg bags for shipments during Feb.- March,2013
- USDA seeks purchase tender for 14720 MT of pulses for shipment in March and first half of April as food aid.
- International lentil markets remained weak on arrivals pressure of new crop. Meanwhile, market participants are expecting lower sown area in upcoming season as of thin buying interest.
- International field pea market remained firm. The green pea markets are at record levels and prices reached to USD 570 per MT.

***Monthly Outlook*:** Steady to weak tone likely to witness in most of the pulses. However, quality of new crop is also likely to affect the prices in domestic market.

2ND Advance Estimates by MOA: Pulses output over 17.5 mn tonne

- MOA revealed that the country pulses production in 2012-13 is likely to around 17.58 million tonnes
- The target for pulses has been set at 18.24 million tonne during the year.
- India needs imports as its required pulses domestic production is insufficient to meet the rising demand. The country's import bill on pulses stood at $1.83 billion in 2011-12.

Pulses

Chickpeas (Chana)

Market Recap:

Weak tone in chana prices witnessed during the month on sufficient stock in domestic market along with continuous arrival of imported chana. Good prospects of standing rabi crop also weigh on the prices.

Current Scenario:

Chana Prices in benchmark markets

Chana Variety and Respective market	12-Dec	13-Jan	Absolute Change	Reason
Australian Chana at Mumbai	3958	3688	-270	• Higher sown area • Good rabi crop • Regular imports • Sufficient stock positions
Gauran Chana at Latur	4008	3565	-443	
Chana Mixed Chana at Latur	4022	3663	-360	
Annagiri Chana at Latur	4369	3790	-579	
G-12 Chana at Latur	4233	3760	-473	
Gauran Chana at Jalna	4266	4002	-263	
Pila Chana at Jalna	4406	4273	-134	
Mixed chana Chana at Akola	3971	3697	-274
