- Dry edible bean exports from Myanmar declined in January, dropping below month earlier levels, though remaining above the quantity exported during the same month last year. Of this total, 76% was exported to India followed by Singapore with 11% and China with 5%. Matpe beans (black gram) accounted for 59% of the total exports followed by Mung beans and Toor Whole with 19% and 17% respectively. (Source-Canadian Grain Commission).

Note: Zero area or production estimates may appear as a result of rounding to the nearest whole number, if production or area estimates are less than 500 tonnes or 500 hectares.

Note: Production, use, trade and stock data are on a marketing year basis: November–October for canola, peas and lupins. Production may not equal the sum of apparent domestic use and exports in any one year because of reductions or increases in stocks. The export data refer to marketing year export periods, so are not comparable with financial year export figures published elsewhere. Some ABARES estimates have been revised based on additional industry information. ABARES is continuing to investigate data.
