International Fundamental:

- The Canadian Grain Commission (CGC) revealed that 85,900 metric tons (MT) of field pea were exported in December. The data doesnot include exports from non-exporting terminals. This season total exports equaled to 775,500 MT since the August start of the current marketing year, versus 1,027,800 MT during the same period last season. The 2011-12 marketing year finished with 1,605,800 MT of peas have been exported through terminals reporting to the CGC, versus 2,461,100 MT the previous season.
- Agriculture Canada states that lentil area is expected to drop for the fourth consecutive year "due to lower returns in 2012-13, particularly for large green lentil types, compared to other crops. As a result, production is forecast to fall sharply. However, the decrease in supply will be dampened by burdensome carry-in stocks which will partly offset the lower production. Meanwhile, the area seeded under chana crop is forecast to fall from 2012-13 because of higher carry-in stocks and continuing decline in prices from the records set in 2011-12. As a result, production is expected to fall to 120,000 MT.

Outlook: - Range-bound trades activity likely to witness on dull demand.
