

Pulses Domestic Fundamentals:

- Steady to weak tone witnessed in Pulses spot market on Saturday.
- Market participants revealed that --
 - ✓ New Chana crop commenced at Kanpur (U.P) traded at Rs.3900/Qtl.
 - ✓ Mumbai (Mah.) spot market witnessed decline in Australian chana prices on higher arrivals.
 - ✓ Sources revealed that standing pulses crop in Guna (M.P.) region is in good to excellent condition.
- At JNPT market, 10 containers of Mozambique tur, 24 containers of Burma urad, 54 containers of Burma moong, 54 containers of Burma tur, 19 containers of Tanzania tur, 7 containers of Argentina green moong, 1 containers of Ethiopia moong, 5 containers of Canada green peas, 509 containers of Australia chana, 22 containers of Australia masoor, 7 containers of Argentina green moong, 2 containers of Ethiopian chana, 2 containers of Tanzania green moong and 10 containers of Canada masoor arrived on Jan.31,2013.
- MOA revealed that Rabi pulses sowing are down by 1.92 lakh ha. to 143.20 lakh ha. as on Jan 24th, 2013 in comparison of 145.12 lakh ha. during the same period in last year.

International Fundamental:

- The Canadian Grain Commission (CGC) revealed that 85,900 metric tons (MT) of field pea were exported in December. The data does not include exports from non-exporting terminals. This season total exports equaled to 775,500 MT since the August start of the current marketing year, versus 1,027,800 MT during the same period last season. The 2011-12 marketing year finished with 1,605,800 MT of peas have been exported through terminals reporting to the CGC, versus 2,461,100 MT the previous season.
- Agriculture Canada states that lentil area is expected to drop for the fourth consecutive year "due to lower returns in 2012-13, particularly for large green lentil types, compared to other crops. As a result, production is forecast to fall sharply. However, the decrease in supply will be dampened by burdensome carry-in stocks which will partly offset the lower production. Meanwhile, the area seeded under chana crop is forecast to fall from 2012-13 because of higher carry-in stocks and continuing decline in prices from the records set in 2011-12. As a result, production is expected to fall to 120,000 MT.

Outlook: - Range-bound trades activity likely to witness on dull demand.
