- During the week ended on March 01, visible supplies of field peas in Canada's licensed elevator system totalled 362,000 metric tons (MT) for the 2012-13 marketing year. Data compiled by the Canadian Grain Commission revealed visible stocks are up 205,300 from 156,700 MT by this time of the season during the last marketing year. Exports totalled 9,500 MT during the week under review, for a season to date total of 1,022,900 MT. - Peas and lentils markets in Canada noticed firm tone following lower stocks and good demand in the domestic and export markets.

- According to Canadian Grain Commission, North American lentil markets finished the week's trading on a firmer note against improved export demand, especially for red lentils. Since the start of the marketing year Canada has exported proportionately more red lentils than green. Though only 43% of the available supply of lentils was red, that class accounted for 51.6% of all lentil exports in the August through December period.
- The USDA's Commodity Credit Corporation office is seeking offers of 12,830 metric tons (MT) of pulses for shipment as food aid. Purchases are for shipment from interior plants between April 1 to April 22 and between April 23 to May 14 for plants located at port.

Outlook: - Pulses prices are likely to notice sideways to weak tone in the near –term amid lack of buying around current levels.
