AGRIWATCH

Sugar & Gur Domestic & International Fundamentals

- Prices continue its southward movement due to weak demand and consistent sugar supply from mills. Also, recent postponement of abolishment of levy sugar quota mechanism depress the market.
- Brazil Center South region likely to produce 36.2 million tons of sugar in 2013-14 up from 34.1 million tons produced last year.
- CCEA yesterday postpone its decision to abolish levy sugar quota mechanism. This delay would increase the pressure on sugar prices in the coming days as expected.
- Meanwhile, domestic sugar refiners losing sugar import parity from Brazil and Thailand as increasing international sugar prices and decreasing domestic prices will close the sugar import gallery soon.
- Presently gur prices are hovering in a range as lower gur stock position compared to last year and increasing arrivals in the market presently offset the impact in the market.
- Total around 624000 bags of gur (40kg each) stored in cold storages till 18th March 2013 which are 461000 bags (40kg each) lower compared to last year same period. Out of total 624000 bags of gur, around 318000 bags of Chaku gur, 76000 bags of Rascut, and 140000 bags of Papdi, stored in the cold storages as reported.

Outlook:

Prices of sugar are moving in a range with weak tone due to ample sugar stocks available in the market. In addition to it, weak demand from stockiest and delay in sugar decontrol announcement by government dampen the prices.
