

### **Daily Sugar & Gur Fundamental Report**

11<sup>th</sup> June, 2013

### Sugar & Gur Domestic & International Fundamentals

- Steady to weak sentiments recorded in key sugar spot markets on Monday.
- USDA predicts India's sugar production could drop down to 23.2 million tons in 2013-14 marketing year. Decreasing sugar production estimate from states like Maharashtra and Karnataka become the major factor for this decline.
- Russia has imported 2.84 lac tons of raw sugar in the first four months of 2013 which is up from 1.08 lac tons in the same period last year.
- Gur prices are moving in a range presently. However, lower gur stock position in Muzaffar nagar based cold storages would curb any decline in the gur prices. Demand of gur likely to go up in the coming monsoon as expected.
- Total around 1231000 bags of gur (40kg each) stored in cold storages till 10th June 2013 lower from 1364000 bags of gur at last year same period (40kg each). Out of total 1231000 bags of gur, around 751000 bags of Chaku gur, 133000 bags of Rascut, and 196000 bags of Papdi, stored in the cold storages as reported.

#### **Outlook:**

Sugar prices are ruling in a downward trend. Major influencing factors are sugar selling by millers in the open market, sugar imports, and overall weak international sentiments due to global sugar surplus. However, prices should move up in the coming days keeping in view close of crushing by millers and increasing summer sugar demand.
