

Sugar & Gur Domestic & International Fundamentals

- Sugar prices moved in a steady tone in key cash markets. Markets are waiting for cues which decide the price movement further.
- Sugar prices made its bottom due to increasing raw sugar import from Brazil. Reported, around 2 million tons of sugar has been imported (mainly by Renuka Sugars) by India from Brazil. However, recent hike in sugar import duty from 10 to 15 percent by government remove the import parity. In addition to it, weak rupee increase the sugar export parity for Indian refiners and they export refined sugar to Middle east countries.
- International sugar prices increase owing to wet weather conditions in Brazil.
- Brazil sugar production likely to decline owing to higher cane diversion towards ethanol production. It is noticeable that crude oil prices are hovering at higher levels which urge Brazil millers to go for ethanol production rather than producing sugar considering higher ethanol demand.
- Sugar production in Thailand may climb by 10% to a record 11 million tonnes in 2013/14 (November to October) as yields increase, according to the Thai Sugar Millers Corp.
- Steady sentiments recorded for gur prices in spot market on Tuesday.

Outlook:

We expect sugar prices would improve in the coming months considering increase in sugar export and upcoming sugar festive demand. Also, lower sugar production estimate for 2013-14 also support the prices in the long run.
