

Daily Sugar & Gur Fundamental Report

27th July, 2013

Sugar & Gur Domestic & International Fundamentals

- Steady sentiments recorded in key sugar spot markets on Friday due to dull trading activities.
- Various trade houses sees present ICE raw sugar future prices made a bottom level which clearly shows a bullish
 view on sugar. We also expect prices of sugar would increase from here owing to increasing ethanol production
 diverted from sugar by Brazilian millers.
- Indian millers are not ready to sell sugar below \$480 per ton, according to trade sources. It is notable that
 depreciating rupee and increasing sugar demand due to Ramadan give Indian exporters some window to export
 sugar.
- Sugar prices made its bottom due to increasing raw sugar import from Brazil. Reported, around 2 million tons of sugar has been imported (mainly by Renuka Sugars) by India from Brazil. However, recent hike in sugar import duty from 10 to 15 percent by government remove the import parity. In addition to it, weak rupee increase the sugar export parity for Indian refiners and they export refined sugar to Middle east countries.
- International sugar prices increase owing to wet weather conditions in Brazil.
- Brazil sugar production likely to decline owing to higher cane diversion towards ethanol production. It is noticeable
 that crude oil prices are hovering at higher levels which urge Brazil millers to go for ethanol production rather than
 producing sugar considering higher ethanol demand.
- Sugar production in Thailand may climb by 10% to a record 11 million tonnes in 2013/14 (November to October) as yields increase, according to the Thai Sugar Millers Corp.

Outlook:

We expect sugar prices would improve in the coming months considering increase in sugar export and upcoming sugar festive demand. Also, lower sugar production estimate for 2013-14 also support the prices in the long run.
